Abstract (en)  
[origin: EP1093890A2] The portable fuel-driven jigger(1) has a guide-tube (3) for discharging fixture elements (10) which are inserted laterally into the guide tube through an outlet (13). A sensor (19) at a position opposite the outlet fits into the guide tube.. The insertion depth of the sensor is determined by a fixture element inserted into the guide tube. The sensor is a section of a swivel locking pawl (16) swiveling on an axle (17) at right angles to the plane containing the central axis (8a)of the guide tube.
