Abstract (en)

[origin: EP1094013A1] A packaging film (F) made from two or more layers (D, I) is joined by an adhesive (C) and has a pre-cut line (L) in one of the layers which acts as a tear line for opening. The tear line is made in a layer of the film which has a tear strength away from the line greater than that of the other layer, while the whole film away from the tear line has a tear strength at least twice that on the tear line, and equivalent to at least 0.23 daN.
