Abstract (en)

[origin: EP1094429A2] A self-checking information transmitting and accident processing service providing system which checks information about the defect and accident of a vehicle at a remote place, and promptly provides an accident processing service, thereby reducing the damage which is occurred by the accident. The system according to the present invention comprises a self-checking information transmitting system which detects and transmits the breakdown and the accident of the vehicle and an accident processing service providing system. The accident processing service providing system provides information about the location of the vehicle to an accident processing office. . Therefore, an accident can be prevented, and the life and fortune of the driver can be protected. <IMAGE>
