Abstract (en)
[origin: DE19828873A1] The mouthpiece has a lower part (1) that is at least partially adaptable for applying suction to different floor coverings with at least one suction channel that can be coupled to a suction connection via a connecting channel in the mouthpiece. Several suction channels (8-10) specially adapted to applying suction to different floor coverings arranged on the lower part of the mouthpiece can be selectively coupled to the suction connector.
