Abstract (en)
[origin: WO0001716A2] The invention relates to a method of inducing a vasculoprotective effect in a subject, the method comprising treating the subject with an ER beta agonist.
[origin: WO0001716A2] The invention relates to a method of inducing a vasculoprotective effect, particularly relating to restenosis, angioplasty, chronic allograft rejection, diabetic angiopathy, autoimmune angiopathy, atherosclerosis and atherosclerosis in a subject, the method comprising treating the subject with an ERbeta agonist. The preferred Estrogen Receptor beta agonist is genistein.
