Abstract (en)  
[origin: CA2336256A1] The invention provides a builder component comprising a ground crystalline layered silicate which comprises at least 95 %, or even 98 % or even 100 % b y weight of crystalline layered silicate having a particle size of less than 1 50 microns or even 102 microns, whilst having a weight average particle size of more than 15.0 microns, preferably from 16.0 to 48.8 microns. The builder component can be used in particular in solid detergent compositions.
