Abstract (en)

[origin: EP0971199A1] An explosive ordnance disposal (EOD) system with improved applications has a hollow charge (4) contained in a non metallic, plastic housing (1) and with the shaping (3) of the hollow charge of amorphous material. The detonator (6) is plugged into the top cover (5) of the housing and the system positioned at the end of a support (16) via a universal joint (12,13,14). This enables the operator to best align the EOD with the ordnance (M) for maximum effect.
