Abstract (en)
[origin: WO9963729A2] The present invention relates to an arrangement and a method for exchange of messages between users in a telecommunications network. Messages are sent from the users mobile phones as SMS messages to a SMS netgate in the telecommunication network. The messages are sent from the netgate to a smsChat server that processes the messages and generates Teletext pages which are transferred to a Teletext inserter which publishes the pages on a public television network.
