Abstract (en)

Beverage container of plastic material, comprised of a body (11) and a cap (12), which enables the beverage to be sucked without any need for the container to be opened. The cap (12) comprises a conduit (15) that enables a first tubing (18), which extends into the container, to communicate with a second flexible tubing (19) that is connected to a beverage sucking spout (20). The spout (20) is brought into its beverage sucking position by means of a snap-acting device (13) comprising an elastic tab (14) that is integral with the cap (12). <IMAGE>
