Abstract (en)

A device for obtaining containers made of ice, for liquids, particularly chilled beverages, comprising a hollow body (2) which has a closed lower end (3) from which a projection (4) protrudes axially and internally. The hollow body (2) can be closed, at its open upper end (6), by way of a lid (7), which can in turn be closed by way of a partition (11) with inclined walls and provided with at least one protrusion (17) which protrudes toward the projection (4). <IMAGE>
