Abstract (en)
[origin: WO0002515A1] A support assembly (1) comprises a head support member (3) mounted on a base (2) which is adapted to stand on a raised horizontal work surface (31), the head support member (3) being adapted to present to a person undergoing treatment a head support surface (17) which is inclined, in use, at an acute angle to the vertical and so as to face upwardly and outwardly from the work surface, the head support surface being provided with a breathing aperture (19), and the support assembly (1) comprising a clamping means (24, Figure 8) or a stop means (15; 15') operative in use to prevent the base from sliding on the work surface (6) away from the user, the clamping means (24), when present, being adapted to clamp the base to the work surface, and the stop means (15), when present, being adapted to engage with an edge (30) of the work surface. The support assembly provides stable, comfortable treatment support for patients in prone sitting and is portable, adjustable and easy to use.
