Abstract (en)
[origin: US6386737B1] Effect wheel rotation system, having a base and at least one effect wheel which is coupled thereto and can be rotated about an axis of rotation by means of a drive, the axis of rotation being arranged offset with respect to an optical axis and the effect wheel having at least one optical element which can be rotated into the region of the optical axis, in which system the effect wheel, independently of a rotation about the axis of rotation, can also be rotated about the optical axis.
