Abstract (en)

[origin: WO9954789A1] The invention concerns a device for protecting and locking a watch interchangeable functional module comprising a case (1) maintained in a support (11) by means of a spring and locked by a nut (6) mounted on the winding and correcting ring (4). The nut (6) also ensures the ring tightness (4) when it is placed in locking position, and comprises a visual indicator (10) enabling the user to control the nut position.
