Abstract (en)

[origin: EP1097873A2] The container comprises a parallelepiped shaped folded cardboard tube, with side walls separated by a distance corresponding to the width of the components (3). A base wall is provided opposite protrusions (32) from the components. A carrier rail (2) is provided along the length of the tube on the base wall. The carrier rail is also folded from cardboard and includes at least one upright (22,23) on which the components rest.
