Abstract (en)
[origin: EP1098272A2] An entertainment machine having associated therewith an input means adapted to allow a first identity, associated with a winning machine result, and a second identity to be input, a control means adapted to control the apparatus, a memory means adapted to store the identities and a pay-out apparatus the control means being adapted to cause the apparatus to require the second identity to be input on a subsequent occasion allowing the identity of the player who entered the first identity to be confirmed and when said first identity has been confirmed said machine being adapted to enter a pay out mode wherein the pay out apparatus is adapted to make an award from the machine. The machine is particularly suitable for playing tournament games in which a prize is paid out a time period after a player has performed his/her prize winning performance. To be accompanied, when published, by Figure 1 of the drawings. <IMAGE>
