Abstract (en)

[origin: WO0004812A1] A dosing device for dispensing a viscous substance, for instance an antiseptic fluid, and comprising a housing (1) in which a compressible container (3) with viscous substance, a dosing pump (4) of the atomizer type for withdrawing viscous substance from the container, and a control member (20) for the dosing pump movable with respect to the housing and reaching to outside the housing are accommodated. The dosing pump which comprises a housing part stationary with respect to the housing and a channel part movable by the control member with respect to the housing part is undetachably connected with the compressible container in the form of a flexible bag and is provided with a coupling member, with which the housing part is detachably fixed in the housing.
