Abstract (en)

[origin: WO0004996A1] The invention relates to a precipitating tube bundle for wet electrofilters. Said precipitating tube bundle consists of several single-piece precipitating tubes which are held, at a distance from each other, by an upper support collar, a central guide ring and a lower guide ring. The advantages of the invention are that the tube bundle is economical and simple to produce, that individual tubes can be replaced and that when an electrical breakdown occurs in one of the precipitation tubes, the adjacent tubes are not damaged.
