Abstract (en)
[origin: US6560875B1] The invention is directed to a dry shaving apparatus with a housing, comprising a housing part (G), at least one cutter element capable of reciprocating in a horizontal plane (E) and a removable frame (WR) having at least one cutter element (S) and detachably held on the housing part (G) by at least two detent mechanisms (R1, R2; R3, R4), said detent mechanisms (R1, R2; R3, R4) being formed by a seating surface (20, 21) provided on the removable frame (WR) and a seating surface (80, 90) of a resiliently mounted detent element (18, 19) exerting a locking force (FR), wherein the detent mechanisms (R1, R2; R3, R4) are capable of exerting a holding function and a vibration-free positioning function of the removable frame (WR) on the housing part (G).
