Abstract (en)  
[origin: WO0005041A1] The invention relates to an electric razor with an electric drive (A) provided in a casing (1) and a casing part (G), wherein an interchangeable frame (WR) with at least one cutting element (S) is retained by at least one locking device (R), wherein the interchangeable frame (WR) is moveably held by a retaining device (HV) in a holding position after the interchangeable frame (WR) is released by the locking device (R). At least one space (W, W1) is provided between a wall of the interchangeable frame (WR) and a wall of the casing part (G) in the holding position and the interchangeable frame (WR) can be set in motion by the drive (A).
