Abstract (en)  
[origin: WO0001591A1] Panel interlocking means (20) and a carton blank incorporating panel interlocking means for securing together a first and a second panel (10, 12) in overlapping relationship, said panel interlocking means (20) comprising a locking tab (22) struck from said first panel (10), and a retaining tab (42) defining a locking aperture (43) struck from said second panel (12), wherein the retaining tab (42) is displaced out of the plane of said second panel (12) to receive said locking tab (22) through the locking aperture (43) to be engaged therewith, wherein the second panel (10, 12) further comprises flexural means (52) to receive the locking tab (22) and to enable an edge of the locking aperture (43) to be displaced out of the plane of the second panel (12) thereby to enable the locking tab (22) to move readily through said locking aperture (43).
