Abstract (en)
[origin: DE19832163A1] A yarn sheet (3) is fed to a size applicator (2) through an inlet tension arrangement (1) which also performs the additional function of applying a pre-wetting agent (10,14), e.g. water at 85 deg C, and squeezing (7,15,16) the yarn sheet. The free path (17) to the size applicator is kept as short as possible and has a cover (19) to prevent heat loss.
