Abstract (en)
[origin: WO0004463A1] Programme logic for the display of text passages relevant to the solution of a task by using a screen and at least one data memory for electronically stored text passages, with the relevant text passages being displayed on the screen upon entering a combination of search criteria. The text passages are displayed on the screen in concentric order around the combination of the search criteria, with the radial distances of the individual text passages expressing their relevance to the combination of the search criteria.
