Abstract (en)
[origin: WO0041159A1] An article (1) comprising a substrate (2) having a first portion of transparent plastic and/or cellulosic material, and a security device (4) provided at a second position on the article spaced laterally from the transparent first portion, wherein the transparent first portion includes verification means (11) to verify and/or inspect the security device when the first and second portions of the article are brought into register with one another. The article, which may comprise a label and/or tag, may be used as means for authenticating the origin of high value products.
