Abstract (en)

A device for and a method of sorting pieces of wood, in which the device comprises a sorting device for sorting the pieces of wood and arranging these in bundles, and an interim storage device for receipt of the bundles. The interim storage device comprises a plurality of interim storage conveyors, each of which is designed to receive a plurality of bundles. <??>By the device described, it is possible to reduce the length of the conveyor considerably, and also reduce the number of packing stations. <IMAGE>
