Abstract (en)

[origin: DE19954390C1] The pneumatic sheet feed system, for a sheet-fed printing press, has a tubular outer section (1) and a concentric and rotating inner tubular section (2), linked to a drive for its rotation. Both tubular sections (1,2) have several rows of control openings (4-7) which are exposed and closed by the rotation of the inner section (2). At least the inner section (2) is supplied with blowing or suction air.
