Abstract (en)
An envelope structure 1 for registering copyright in relation to a document 2 comprises a rear panel 5, an intermediate panel 6 and a front or user panel 7. The intermediate panel 6 is attached to the rear panel 5 along three edges to define an opening 9 and a closure flap 10. The user panel 7 is divided by lines of perforations 20 into a user registration certificate 21 and a registration form 22. Bar codes 30, 31, 32 are provided on the certificate 21, form 22 and the remaining envelope structure. A user enters details such as a signature and date 25 onto the certificate 22 and an image 25a is automatically copied onto the envelope. The registration form 22 is folded over and the flap 10 seals the copyright material 2.
