Abstract (en)
An alkali-disposable ostomy bag 20 is disposed of in a wc 14 using a tablet 1 having inner and outer portions. The inner portion 10 is of an alkali and this is covered by the outer portion 11, which is a non-irritating mixture of a water-softening agent and a surfactant. The tablet 1 can be handled safely by the user because the alkali 10 is covered by the outer portion 11. <IMAGE>
