Abstract (en)
A handle (1) for a vehicle door (2) extends in a mid-plane (P) and has a connecting structure (10) fittable to the door (2), and a control lever (15) gripped manually by a user and movable between a rest position and a control position to control a lock on the door; the control lever (15) has a first end portion (17) connected to the connecting structure (10) by a substantially spherical articulated coupling (31), and a second end portion (18) connected to the connecting structure (10) by a flexible guide and slide coupling (37) to enable the second end portion (18) to travel along any path between the rest position and the control position and crosswise to a longitudinal direction (A). <IMAGE> <IMAGE>
