Abstract (en)

A handle (1) for a vehicle door (2) has a supporting structure (10) fittable to the door (2), and a control lever (15) having an elongated grip portion (16) and which is movable, with respect to the supporting structure (10), between a rest position and a control position controlling a lock on the door (2); the control lever (15) is connected to the supporting structure (10) by a guide and slide assembly (37) to enable the grip portion (16) to move between the rest position and the control position along a conical surface (S) having a generating line (D) substantially parallel to the elongated grip portion (16). <IMAGE> <IMAGE>
