Abstract (en)  
[origin: EP1099823A2] The framed panel consists of a frame element in which is an opening (22) containing a filler panel (28) which has a protuberance on its front side. The filler rests against the reverse side of the frame element. On each side of the opening is a vertical holder-section (14,16) extending backwards from the reverse side of the frame element. The side of the holder sections facing the opening contains a vertical gap next to the reverse side of the frame element and into which the matching side edge of the filler panel extends. The back edge of the vertical gap has a pressure piece resting against the reverse side of the filler
