Abstract (en)
[origin: EP1099905A1] The gas burner for a domestic hob has a burner head (3) with branches (4) having openings (6) for the primary air fed by a passage (12). The head is raised above the base plate. Secondary air is fed by a second passage extending through the base plate and having ducts to allow vertical flow of the secondary air along the central head. The secondary air flow ducts have raised lugs 99) between each branch pair at the level of the base plate and defining a vertical surface.
