Abstract (en)

[origin: WO0007437A1] This invention provides a method of identifying biologically active or otherwise valuable substances exuded from or onto a plant surface, specifically the plant cuticle. This invention also provides a method of identifying and recovering substances exuded from or onto the roots of a plant. The invention further comprises libraries of substances exuded or secreted from various plant species, which may be elicited or induced to produce one or more of such substances.
