Abstract (en)

[origin: WO0074658A1] The present invention relates to the use of drug-loaded nanoparticles for preparing a medicament for the treatment of cancer, particularly for the treatment of cancer in the brain, even more particularly for the treatment of brain cancer in humans. The invention also relates to a process for the treatment of brain cancer, particularly for the treatment of brain cancer in humans by administering an effective amount of nanoparticles containing a substance which has effect in the cancer treatment or has immunosuppressive effects.
