Abstract (en)  
[origin: DE19924229A1] The invention relates to a snowboard (1), whose binding (9) for each foot has screw holes in the base area (11). Screws (11 to 14) project through said screw holes in tapped bushes (5 to 8). Two guide rails (3, 4) which extend in the longitudinal direction of the snowboard are mounted onto the snowboard (1) for each binding (9). The tapped bushes (5 to 8) can be displaceably guided along said guide rails.
