Abstract (en)

[origin: WO0006479A1] The invention relates to a method and a device for cutting yarn (9) on a textile machine, comprising a blade (6) which is supplied with kinetic energy via a drive (2, 3, 4). To be able to generate at all times a sufficient yet not excessive cutting power the kinetic energy is delivered in doses and rated in accordance with properties of the yarn and/or device. The drive thus comprises a device (14) for rating the kinetic energy of the blade.
