Abstract (en)

[origin: WO0006680A1] The present invention is a fabric care composition comprising a nitrogen containing compound selected from a polyamino-functional polymer, a dye fixing agent, and mixtures thereof, and a scum reducing agent selected from a water-soluble cationic surface active agent; a polyoxyalkylene alkyl amine surface active agent, and mixtures thereof, whereby the composition exhibit reduced or even no scum formation on fabric and/or washing machine parts compared to compositions which do not comprise the scum reducing agent.
