Abstract (en)

[origin: WO0006769A2] This invention relates to polymorphisms in the human CCR-2 gene, in particular to the discovery of two polymorphisms in the coding sequence of the CCR-2 gene and 11 polymorphisms in the promoter sequence of the CCR-2 gene. The invention also relates to methods and materials for analysing allelic variation in the CCR-2 gene, and to the use of CCR-2 polymorphism in the diagnosis and treatment of CCR-2 ligand mediated diseases such as rheumatoid arthritis and other inflammatory diseases.
