Abstract (en)

[origin: WO0073561A1] In order to be able to use dobby looms in a more universal manner with respect to their utilization, particularly with respect to weaving possibilities, specific product loss and utilization of performance parameters, the invention provides for quick replacement of a dobby head driven in connection with a dobby loom by an eccentric machine. A means of transport (4) which is embodied according to the invention is provided for performing a quick change, wherein the connecting means (2a; 3a) of the relevant shedding machine (2; 3) can be positioned on the connecting means (1a) of the dobby loom (1) with a minimum number of service staff.
