Abstract (en)

[origin: FR2794223A1] The invention concerns a method for incinerating a body and an incinerator for implementing said method. The method comprises a step which consists in placing the body in the combustion chamber (2) of an incinerator (1), without preheating, and a step which consists in generating a flame (19, 20) under pressure at high temperature towards the combustion chamber, and a step for the combustion of the body by carbonising or evaporating the body surface molecules by contact with the flame exhibiting a temperature ranging between 2000 and 4000 DEG C.
