Abstract (en)  
[origin: WO0007125A1] A system is disclosed for maintaining, accessing, and archiving digital assets. The system integrates file and image management functions with the storage of information about the files and images. In addition to providing access to the graphic assets themselves, the system also associates the assets with other information whereby a user (16) can track completed work and define new projects. Further, system information is stored in a data hierarchy that is complementary to the natural business processes.
