Abstract (en)

[origin: WO0007190A1] The invention concerns a device for displaying audio compact discs comprising a case (30) for housing the disc. Said case comprises push-buttons (34) for selecting a sequence of a disc, a memory (52) for storing graphic data related to the sequences stored on the disc, circuits (44, 48) for causing to be displayed by the player (36) on the display screen (32) the graphic data of the selected sequence in synchronisation with player, and a transmitter (36) of electromagnetic signals for transmitting data to the player.
