Abstract (en)

[origin: EP1101539A2] In the method the esp. clear varnish region surrounding the varnish concn., (20), is covered before the grinding off operation, by a protective foil (10) with an opening (12) leaving exposed solely the clear varnish concn. (20) and its direct surrounding. The dia. of the opening (12) for the individual varnish lumps is selected respectively matching depending on the foil thickness and the foil material.
