Abstract (en)

When changing from an air conditioner having an existing piping (6) to a new air conditioner, the existing piping (6) can be used as it is. In this method, an air conditioner having an excellent long-term reliability can be installed. A piping cleaning method of air conditioner for removing foreign matter existing in the piping installed between an indoor unit and an outdoor unit includes (a) a step of inserting a compound (7) from an opening of the piping, (b) a step of leading a compressed gas from the opening into the piping, and conveying the compound (7) through the piping while keeping the compound (7) in contact with the inner wall of the piping, and (c) a step of removing the foreign matter existing in the piping, together with the compound (7), from the piping. <IMAGE>
