Abstract (en)

[origin: WO0006614A1] There is provided a catalyst containing a transition metal precursor having the formula (C₅R<1>5)TiY₃, (wherein each y is independently selected from the group consisting of a C₁-C₂₀ alkoxide, a C₁-C₂₀ amide, a C₁-C₂₀ carboxylate and a C₁-C₂₀ carbamate) an alcohol or carboxylic acid, an aluminoxane, and optionally a substituted bulky phenol and/or a support or spray drying material. There is also provided a polymerization process employing the catalyst composition, a polymer produced using the catalyst, and a cable produced therefrom.
