Abstract (en)

[origin: WO9958769A1] The invention relates to a tilting jack offshore platform (1) comprising a work deck (2) and legs (3) supporting the work deck (2) , wherein each of the legs (3), at one of their respective ends is attached to the work deck (2) by a, in relation to the work deck (2), movable coupling (4, 6). The coupling is arranged such that the legs in their longitudinal direction can be positioned beside or underneath the work deck (2).
