Abstract (en)  
[origin: WO0008585A2] A series of digital video snapshot pictures taken by a surgeon during endoscopic surgery is correlated with a series of comments made by the surgeon during surgery. The pictures and comments are displayed on a monitor in an associated correlated format after surgery to allow the surgeon to select those images and comments deemed most appropriate for inclusion in a surgical report. The selected images and comments are downloaded into a word processing software package which combines the images and audio comments with other information such as patient data and surgery data. A final report is produced with preformatted electronically produced templates displaying text and images and allowing for the audio replay of the surgeon's comments.  
[origin: WO0008585A2] A series of digital video snapshot pictures taken by a surgeon (12) during endoscopic surgery is correlated with a series of comments made by the surgeon during surgery. The pictures and comments are displayed on a monitor (20) in an associated correlated format after surgery to allow the surgeon to select those images and comments deemed most appropriate for inclusion in a surgical report. The selected images and comments are downloaded into a word processing software package which combines the images and audio comments with other information such as patient data and surgery data MsTEP 7). A final report is produced with preformatted electronically produced templates displaying text and images and allowing for the audio replay of the surgeon's comments (Step 8).
