Abstract (en)

[origin: WO0008623A1] The invention concerns a method for illuminating patterns in fireworks which consist in illuminating by igniting a pyrotechnic piece, a pattern constituted by translucent portions (18) of a panel (14) comprising opaque and translucent portions and located between a pyrotechnic piece (10) and the spectators. The material forming the panel is a translucent material forming a light box which is lights up when the pyrotechnic piece (10) is ignited, the panel opaque portions being constituted by portions which have been covered with an opaque coating.
