Abstract (en)

[origin: EP1103439A1] The wagon has wheels on turning bogies (4) and towbars (5) connected by a horizontal cardan joint to a wagon bridge (1) at an application point (6) facing the center of the wagon. The bogies support the wagon bridge vertically by means of side support elements (7) which run on an arc-shaped track with the center point of its curvature exactly over the application point.
