Abstract (en)
The invention relates to an automatic apparatus for cutting fabrics. It comprises a device (1) for shaping an edge (2a) of a length of fabric (2) and at least one drive roller (3) designed to allow displacement of the fabric (2) from one side to the other of the shaping device (3). The apparatus (10) is also provided with cutting means (4) which are designed to remove the edge (2a) of the fabric (2) and can be positioned so as to be able to operate both in series with the shaping device (1) and in synchronism therewith. <IMAGE>
