Abstract (en)

A method for fitting slabs of thermal insulation (15) around the edges of a poured concrete floor has metal brackets made of flat strip and adjusted to fit over the top of the support wall. The bracket is adjusted to the width of the wall by overlapping central sections (6). The outer end of the bracket has an upper extension which supports the outside of the insulation (15). Pins (21) grip the bottom edge of the insulation and the bracket is secured to the wall by masonry pins. The slabs of insulation form the outer shuttering for the poured floor and the brackets remain in place to be covered by the subsequent rendering of the walls.

Abstract (de)

Eine Hilfsvorrichtung zur Halterung der Randisolierung (15) bei der Fertigung von Betondecken, -gurten, -kragplatten und dergleichen in Form eines Bügels (11) mit einem Basisteil (12), das auf den oberen Rand einer Wand (10), eines Rollladenkastens oder dergleichen aufsetzbar ist, wobei am Basisteil (12) mindestens ein nach oben ragendes Anschlagelement (13) für eine Randisolierung (15) des zu fertigenden Betonteils vorgesehen ist.
